WELCOME TO **OLULAD** TECHNOLOGIES COMPANY LTD.

THE COMPANY

OLULAD Technologies Company Limited is an indigenous industrial engineering service provider and contracting company, fully registered under the corporate affairs commission of Nigeria in 2013 with registration number RC 1092190.

Our aim is to bring indigenous industrial engineering services to your door step. We deliver standard services for all industrial, commercial and domestic needs

including fabrication and installation of steel structures, Insulation, H.A.V.C (Duct work) among others.

We render our services using the best materials with standard practise and professionalism. Over the years, we have been able to establish strong relationship with our clients through delivery of timely, cost effective and quality services.

OUR VISION

OLULAD Technologies Company Limited is established with a vision to be among the Leading Professionals in Construction, Fabrication, Installation and Maintenance Services in the field of Industrial Piping and Insulation, Steel Structures, H.A.V.C (central duct work) for industrial and domestic needs.

OUR MISSION

- Providing our esteemed client with innovative solutions matched with effective, on-time delivery of high quality, cost effective, comfortable and safe services.
- Providing a safe and environment friendly services that would foster stronger relationship with our clients and significant others.
- Through value engineering, we provide effective construction practices that would guarantee higher returns to our clients at minimum cost and without jeopardizing timely delivery projects.

INDUSTRIAL INSULATION

INDUSTRIAL INSULATION

Insulation include cutting and fitting a variety of insulation materials and shaped sheet metals to pipe work, valves, pressure vessels, tanks duct work on any hot or cold surfaces of the purpose of thermal insulation, fireproofing, or soundproofing. It also involves the cladding of insulation material with suitable coverings. Other insulated components often include; equipment, tanks, boilers HAVC (central ductwork) etc.

Olulad utilizes an extensive selection of insulation materials and cladding types designed to service thermal, acoustical and production applications with a purpose of providing the best solution to meet the client needs.

Our qualified insulation tradesmen install these materials to withstand the service demand for vibration, extreme temperatures and mechanical damage. Our qualified installer ensure that the mechanical insulation requirements are installed in a safe and cost effective manner.

INSULATION FOR ALL KIND OF SERVICES

Heat Conservation/Process Control (Hot, Cold and Cryogenic Services)
Acoustic Insulation
HAVC Air Distribution Network (Ducting)

USING SUITABLE INSULATION MATERIALS AND PROTECTIVE JACKETING

Mineral Wool
Glass Wool
Calcium Silicate
Synetic Rubber
Polysterene
Rigid Polypolyurethaane/Polyisocynurate foam and others

PROTECTIVE JACKETING:

Aluminium
Stainless
PVC
FRP (Fiber Reinforced Plastics)

PIPE AND TANK FABRICATION AND INSTALLATION

PIPE AND TANK FABRICATION AND INSTALLATION

At **Olulad Technologies Ltd.** pipe fabrication and installation is one of our area of interest. With Our experienced Engineers - with ample knowledge of pipe and fittings specifications, Fitters, Fabricators, and certified Welders, we provide our client with quality facets of piping fabrication, installation, replacement, modification works. We handle works on various sizes of pipe from tubing to large pipe size and materials-carbon steel and stainless steel. We also undertake Fabrication, and Erection of carbon/stainless steel welded storage tanks and pressure vessels, sand blasting, corrosion protection and repairs of all sizes. Works are delivered with conformity to design or customer specification.

Piping for all Fluid Services

Raw, intermediate, and finished chemicals

Petroleum products

Gas, steam, air, and water

Fluidized solids

Refrigerants

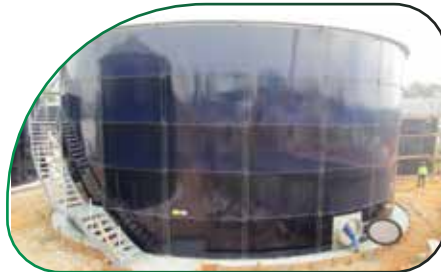

Pressure Vessels

Storage tanks

Process tanks

Sand blasting

Corrosion Protection

DUCTING SYSTEM

We provide services in fabrication and installation of duct system used for the movement of air in air conditioning, heating, ventilating and exhaust systems. Sheet metal and P3 ductings with accessories are fabricated and installed in compliance with design that enhance reliability and functionality.

STRUCTURAL STEEL WORK

Fabrication and erection of structural steel are handled with up-to-date know-how and adherence to specification and codes of standard practice. Our Engineers, Fabricators and Erectors wealth of knowledge and experience guarantee delivery of quality, durable, cost effective and safe structures. Steel with correct metallurgical characteristics, sizes and shapes are used for construction in ensuring quality and adequate factor of safety. We specialize on structures constructed with steel such as building framework, frames to mount equipment and machineries, platforms, among others.

SANDWICH PANELS

We install all type of insulation panels (insulating core: mineral wool, Polyisocyanurate or Polyurethane) for industrial, office and commercial requirements .We provide wide range of steel construction and materials necessary for the complete installation of the panels.

- Industrial buildings, including production facilities and storehouses,
- Commercial buildings and offices, cabins,
- Food industry facilities, including coldrooms and freezer rooms

FACILITY MAINTENANCE

We offer wide range of maintenance services from periodic preventive maintenance for mechanical equipment such as Air Handling units, repair/retrofit of service piping/plumbing and equipment to building/structures maintenance.

Our employees are a mix of multi-talented, multi-skilled trades personnel who are experienced in all areas of building, mechanical, electrical, plumbing and structural systems. We undertake for preventive maintenance in buildings as well as routine maintenance, repair, and emergency response. We ensure that they operate at peak efficiency through professional engagement of prompt response and standard maintenance program.

OLULAD Technologies will serve as an extension of your company's maintenance department. Our team will be available to get the work done quickly and at a cost-effective price. We shall also provide you with data to make valuable decisions.

HEALTH AND SAFETY POLICY

Health and Safety forms an integral part of the Company's Business Strategy and the company is committed to proactively:

- Implementing and maintaining an occupational health and safety management system that conforms to industrial safety requirements.
- Ensuring the health, safety and welfare of our employees, customers and any other persons that could foreseeably be harmed by our activities in work place.
- Provide extensive information, instruction, training and supervision with the objective of ensuring the health and safety at work of every employee
- Raising the awareness of all our employees in other that the benefit of meeting occupational health and safety objectives are understood.
- Assessing the risk associated with our work activities and implementation control measures to ensure, as far as is reasonably practicable
 - Place of work are maintained in a safe condition
 - Working environments are safe and without risk to health
 - Safe handling and use of substance
 - Work equipment and system of work are safe and without risk to health
 - Adequate information, instruction, training and supervision are provided to ensure the safety of employees and others.

All employees are expected to accept their responsibilities to work safely, to follow company health and safety rules and procedures, and report any unsafe acts or conditions.

QUALITY POLICY

We at **Olulad Technologies** are committed to continually improve our services with quality consciousness. We set up strategies to establish and maintain a quality management system which meets or exceeds the requirements of the internationally recognised quality standards.

We try to understand all requirements of our clients, cooperate with them for the exact definition of requirements for the quality of delivered services and ensuring that all our customers are completely satisfied with services we provide for them.

QUALITY OBJECTIVES

- Supply consistent reliable technical services to enhance customer satisfaction
- Comply with all applicable standard procedures for each trade
- Respect for quality, safety concerns of employees, customers
- Establish periodic quality objectives and target
- Motivate by upgrading the knowledge and skill level of all employees through professional training and its assessment for effectiveness.

PREVIOUS WORK

Among several other projects handled by Olulad Technologies are:

2023

FAN MILK, ELEYELE, IBADAN

- Fabrication of 10,000 Litres of Diesel Tanks

HAYAT, AGBARA

- Fabrication of Air Handling Unit (AHU) Line

2022

FAN MILK, ELEYELE, IBADAN

- Fabrication of Stainless Steel Pipe Layout

- Pump Installation for Milk Collection

HAYAT, AGBARA

- Compress Airline to Feed Mini Tape Machine

2021

HAYAT, AGBARA

- Construction and Installation of Second Level Platform for Cooling Tower

GUINNESS, OGBA

- Lagging and Cladding Insulation Work

2020

HAYAT , AGBARA

- Fabrication of Chemical Containment

HAYAT , AGBARA

- Fabrication and Installation of Cover for Cable and Diesel Pipeline Channel

2019

DANGOTE REFINERY/ LYOLD INSULATION

- Installation of Mechanical insulation on Heat Exchanger and Vessels

FANMILK NIG. PLC IBADAN.

- Fabrication of Effluent Pretreatment Tank

- Construction of Floating Pump Station at Eleyele dam

RAFFLES OIL LFTZ ENT, LAGOS.

- Modification of spiral conveyor into Gravity roller conveyor.

2018

GREENVILLE GAS STATION , KADUNA

- Mechanical insulation fabrication and installation for NLG line.

2017

BLACK HORSE PLASTIC, IBADAN

- Mechanical insulation on chill water line.

HAYAT KIMYA, AGBRARA, OGUN STATE

- Various Steel Structures fabrication.

2015

SHELL/IMANI HOUSING PROJECT ABUJA

- Installation of Foam insulation on Chilled water pipes for 32 Blocks of flats

2014

21ST CENTURY DATA CENTER LEKKI, LAGOS

- Insulation of Chilled Water Pipe using PUR

FRANSSEN INSULATION (Holland)

- Insulation on Vacuum drier and its piping network at Cadbury Nigeria.

2012/2013

OLAM CASHEW FACTORY

- Fabrication and installation of hot Cashew oil pipeline.

- Construction and Erection of production gantry.

2010

MITECO INTERNATIONAL (Switzerland)

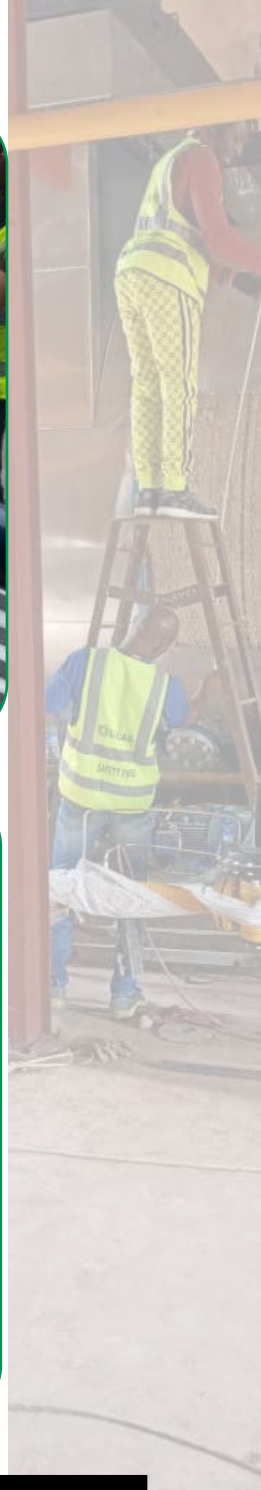

- Mechanical fabrication and insulation for cold and steam lines at Guinness Nigeria

- Insulation of heat exchanger boxes
